These tools comply with TSA guidelines for airplane carry-on. However, even if an item is generally permitted, it may be subject to additional screening or not allowed through the checkpoint if it triggers an alarm during the screening process, appears to have been tampered with, or poses other security concerns. The final decision rests with TSA on whether to allow any items on the plane.

## How to position tools in the case for easy removal:

- A. Position scissors in the leftmost slot with thumbhole to the right.
- B. Position toothpick with protrusion facing up.
- C. Position pen with protrusion facing to the side.
- D. Position fingernail tool so bottle-opener end is facing out and file is facing up.
- E. Position tweezers with open end in and thumbnail notch out.
- F. Position screwdriver tool so thumbnail notch is up and facing out.

## Installation Instructions

Position phone in tool case so its openings align with camera lens and control buttons. Snap into place.

## Removal Instructions

1. With the screen facing toward you, press your fingers against the back of the case.

2. Use your thumbs to pry open the top corners of your case away from your phone.

3. When the two top corners are free, your phone will angle out of the case easily.
